THE BEST WAY TO IRRIGATE AND FERTILIZE LARGE FIELDS

Fully Automated Irrigation System

The Delta platform allows manual and remote irrigation management for central pivot systems, including programming, monitoring, and controlling the irrigation system, pumps, soil moisture, and weather data.

Optimal Water Distribution

Ensures uniform water distribution across the entire field with efficient sprinklers, reducing evaporation and increasing irrigation efficiency.

Customized Design

Advanced hydraulic design with various pipe sizes and lengths to meet different needs, available in three lengths and two heights.

After-Sales Service

Continuous support, maintenance, and original spare parts to ensure long-term efficiency.
